

# ARYAN SINGH

Artificial Intelligence & Data Science Engineer

2022.aryan.singh@ves.ac.in  
+91-9158634993 | Chembur, Mumbai  
github.com/aryan050704  
aryan050704.github.io/portfolio

OFFER ACCEPTED System Engineer · Tata Consultancy Services (TCS)

Joining 2026

## CONTACT

### Email

2022.aryan.singh@ves.ac.in

**Phone** +91-9158634993

**Location** Chembur, Mumbai

**GitHub** aryan050704

**Portfolio** aryan050704.github.io/portfolio

## SKILLS

### Languages

Python, SQL, Java, Dart, C, HTML/CSS

### ML / AI

PyTorch, Scikit-learn, XGBoost, Pandas, NumPy, FAISS, sentence-transformers

### LLM / Agents

RAG, Prompt Engineering, Ollama, OpenAI API, Multi-Agent Systems

### Cloud / MLOps

AWS SageMaker, Redshift, Drift Detection, Model Monitoring, Git, Docker

### Frameworks

Streamlit, Django, Flutter, Firebase

## EDUCATION

### B.E. — AI & Data Science

VESIT, Mumbai  
2022 – 2026 | CGPA: 8.2 | Graduated

### HSC — CBSE

Chinmaya Vidyalaya, Boisar  
2019 – 2021 | 89.4%

## CERTIFICATIONS

### Google IT Automation with Python

Professional Certificate · Coursera

### Machine Learning A–Z

Hands-On Python & R · Udemy

### Oracle Certified Java Developer

Oracle

### AWS Cloud Foundations + Essentials

Amazon Web Services

### Data Science Foundations

IBM Skills Network

## BEYOND TECH

### National Theatre Actor

Indian National Theatre (INT)

Performed at national level. Sharpened public speaking, storytelling & stage presence.

### Competitive Athlete

Multi-sport competitor. Brings discipline, resilience & performance under pressure.

## PROFILE

B.E. graduate in AI & Data Science (CGPA 8.2) from VESIT Mumbai. Experienced in building end-to-end ML systems, LLM pipelines, RAG applications, and production-grade monitoring tools. Incoming System Engineer at TCS. National-level theatre actor and competitive athlete.

## WORK EXPERIENCE

### Data Science / ML Intern · Sensor Equation

May 2025 – Jul 2025

- Built anomaly detection on AC time-series sensor data using **Isolation Forest** — achieved **F1-score 0.80**.
- Processed data at scale with **AWS SageMaker + Redshift**; handled cleaning, feature engineering & model training.
- Developed **LSTM model** to predict future maintenance dates, improving proactive scheduling accuracy.
- Validated production deployment by mapping anomaly windows to real maintenance periods.

Python · AWS SageMaker · Redshift · Isolation Forest · LSTM · Feature Engineering

### Full-Stack Developer Intern · Menstrual Health App

Jan 2024 – Mar 2024

- Built full-stack web app with cycle tracking, symptom logging, **ML-based predictions**, and reminders using Django REST API.

Django · Python · REST API · Machine Learning

### Flutter Developer Intern · Studio Management App

Aug 2023 – Oct 2023

- Built **Flutter + Firebase** Android app for studio bookings, schedules & inventory — deployed to 20+ staff users.

Flutter · Firebase · Dart

## KEY PROJECTS

### Multi-Agent Research Assistant Python · Ollama · OpenAI API · Streamlit

Planner → Researcher → Summarizer agent pipeline — decomposes queries, researches sub-questions with context passing, synthesizes final answer.

### RAG Document Intelligence FAISS · sentence-transformers · PyMuPDF · Streamlit

Fully local RAG: PDF/DOCX ingestion, FAISS vector search, extractive & generative answer modes. No API key required.

### Stock Forecast Engine XGBoost · PyTorch · yfinance · Scikit-learn

XGBoost + LSTM ensemble with 20+ technical indicators (RSI, MACD, Bollinger Bands) and full backtesting vs buy-and-hold.

### ML Model Monitor SciPy · Scikit-learn · Pandas · Streamlit

Production-grade data drift detection (PSI, KS test, KL divergence) with sliding-window performance tracking and alerting dashboard.

### Prompt Optimization in LLMs (Final Year Project) LLMs · IoT · Liquid Neural Networks

Prompt optimization techniques to reduce token usage; integrated IoT sensor data with LLM pipelines for real-time industrial anomaly detection.
